

**REMARKS**

Claims 15 to 19 and 21 to 28 were rejected under 35 U.S.C. §102(b) as being anticipated by U.S. Patent No. 5,625,657 to Gallacher (hereinafter “Gallacher”). Claim 20 was rejected under 35 U.S.C. §103(a) as being unpatentable over Gallacher.

Reconsideration of the application based on the following remarks is respectfully requested.

**35 U.S.C. §102 Rejections**

Claims 15 to 19 and 21 to 28 were rejected under 35 U.S.C. §102(b) as being anticipated by Gallacher.

Gallacher discloses a method for repairing a nuclear fuel rod assembly with damaged fuel rod and/or a damaged spacer. The “nuclear fuel rod assembly [has] a plurality of spaced apart grid spacers comprising an arrangement of a first plurality of grid strips intersecting each other to form a first plurality of spacer cells through which fuel rods extend and for maintaining the fuel rods in a predetermined position within said assembly, an upper tie plate located at the top of said assembly, and a grid spacer having a damaged spacer cell.” (Col. 2, lines 29 to 36).

Claim 15 recites “[a] nuclear fuel assembly comprising:  
a group of nuclear fuel rods and a support skeleton, the assembly comprising:

two nozzles;

guide tubes interconnecting the nozzles; and

spacer grids secured to the guide tubes and serving to hold the rods;  
the nuclear fuels rods extending along a longitudinal direction and being disposed in a substantially regular array;

the assembly including at least one support skeleton reinforcing device disposed between two successive spacer grids and secured to the guide tubes, and the reinforcing device being disposed inside the group of rods and presenting a transverse extent that is less than the transverse extent of the array of rods.”

The Office Action is in clear error in asserting in section 3 on page 2 that in Gallacher the “guide tubes are secured to the fuel rods and the reinforcing device is secured to the fuel rods; thus the guide tubes are indirectly secured to the reinforcing device.” The word “secured” means “firmly fixed” or “fastened.” (See attached copy of definitions for the word secure from thefreedictionary.com, on page 1, verb definition 2; page 2, verb definition 4). The guide tubes 14 are not firmly fixed or fastened to the fuel rods 16 of Gallacher since, as acknowledged in the Office Action, sliding is permitted between the fuel rods 16 and the spacer grids 18 of Gallacher. “Springs incorporated in the spacer grids are most frequently used to permit some sliding of the fuel rods with respect to the spacer grids. In some of the designs, the spacer grid is free to move axially a small amount to accommodate minor changes in the axial length of the fuel rods during irradiation.” (Col. 1, lines 46 to 53) (emphasis added).

Furthermore, even if the guide tubes were secured to the fuel rods, which they are not, the fuel rods of Gallacher are not even secured to the reinforcing device as asserted in the Office Action.

Therefore, since Gallacher does not disclose a support skeleton reinforcing device that is secured to guide tubes, it does not teach all limitations of claim 15, Gallacher cannot anticipate claim 15.

Withdrawal of the rejection of independent claim 15 and claims 16 to 19 and 21 to 28, dependent on claim 15, under 35 U.S.C. §102(b) is respectfully requested.

#### 35 U.S.C. §103 Rejections

Claim 20 was rejected under 35 U.S.C. §103(a) as being unpatentable over Gallacher.

Claim 20 is dependent on claim 19, which in turn is dependent on claim 15. Thus, in light of the discussion above regarding independent claim 15, withdrawal of the rejection of claim 20 under 35 U.S.C. §103(a) is respectfully requested.

Application No. 10/573,642  
Response to Final Office Action dated May 8, 2009

[12928/10027; 569.1013]  
September 8, 2009

**CONCLUSION**

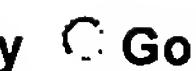

It is respectfully submitted that the application is in condition for allowance and applicants respectfully request such action.

If any additional fees are deemed to be due at this time, the Assistant Commissioner is authorized to charge payment of the same to Deposit Account No. 50-0552.

Respectfully submitted,
